The Department of Inventions has the following sections:

- d. Technische Prüfung. Employed there are (fnu) Behr, (fnu) Fischer, (fnu) Schilling, (fnu) Anger, (fnu) Willert, and (fnu) Scheffler.
- e. Anwendung und Nutzung. Employed there are (fnu) Neske, (fnu) Gelbert, and (fnu) Bredemahl.
- f. Beratung und Gewerblicher Rechtsschutz. under Herr Kirsten.

The Department of Development and Research is divided into the following sections:

- g. Department for Perspective Planning (Perspektive Planung).
Dr. Wittbrodt is the temporary chief.
- h. Department for Operative Planning (Operative Planung).

The chief is Herr Muchow.

The Department of Development and Research is further divided into the following branches:

- 1. Mining and metallurgy (Bergbau und Metallurgie).
- j. Machine construction (Maschinenbau). Herr Gottschalk, formerly of Heeres Waffenamt, is the chief of both branches.
- k. Electrical Machine Construction and Energy (Elektro-Maschinenbau und Energie).
- l. Telephony and Telegraphy (Fernmeldetechnik). Herr Röhl is chief of both branches.
- m. Fine Mechanics and Optics (Feinmechanik und Optik). The chief is Dr. Hermann Lüscher.
- n. Chemistry (Chemie).
- o. Light Industry (Leichtindustrie). Chief of both of these branches is Herr Lichtenstein.
- p. Food (Nahrung und Genussmittelindustrie).
- 1. Agriculture and Forestry (Land und Forstwirtschaft).

Professor Ziegelmayer**** is chief of both branches.

- 4. Under the guidance of the Main Administration of Science and Technical Matters are also the German office for weights and measurements (Deutsches Amt für Masse und Gewichte, DMAG) in Berlin and Weida, Saxony, and the Geological Institute (Geologische Landesanstalt).

* Comments: Dr. Ing. Werner Lange, metallurgist, studied at Aachen and later joined the Mining Academy of Freiberg, where he became director of the Institute for Metallhüttenkunde, Freiberg, Bertholdsweg, 46, until he was appointed chief of the Main Administration for Science and Technical Matters.

** Comment: Dr. Ing. Otto Emmersleben has been dismissed from the Information office because he could not decide to give up his apartment in the West Sector of Berlin and move into the East Sector at the request of the DWK. This is rather surprising, since Emmersleben has expressed his sympathy for the SED at the DWK.

*** **Comment:** Engineer Israel has been publicized in the SMA-sponsored newspaper Tägliche Rundschau as an activist. However, he could not make up his mind whether to accept the position of chief of the section for standards. He is a former Regierungsrat and was chief of the Bureau of Standards for the Land Government of Saxony. He joined the Chamber of Technology of Saxony where he is working on standards. Since no applications of able engineers who are experienced in standards have been submitted to the DWK, negotiations with Israel will be resumed again, and the DWK hopes that he will accept this time.

25X1A **** **Comment:** Professor Dr. Wilhelm Ziegmayer, Berlin-Wilmersdorf, Rudolstädterstrasse 99, former vice president of the "Zentralverwaltung für Handel und Versorgung," is well known for his process of making synthetic butter from coal. Ziegmayer is also director of the Institut für Ernährungs- und Verpflegungswissenschaft, Berlin-Dahlem, Thielallee 69, and teaches at the Landwirtschaftlich-Gärtnerische Fakultät, University of Berlin.
